

# VeriCure® + United Felts

NOW DELIVERING A POWERFUL COMBO TO FURTHER ENSURE YOUR CURE!

## SMARTER CURING STARTS HERE.

VeriCure, the nation's leading CIPP curing monitoring system, is now part of the United Felts Family. Built around Fiber-Optic Distributed Temperature Sensing (DTS) technology, VeriCure continuously monitors temperature during liner installation. This helps confirm a more complete cure throughout the length of the host pipe, resulting in a fully cured, leak-free pipe — rehabilitated with confidence and verified with data.

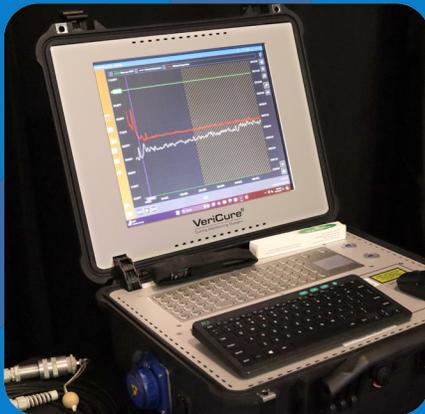

As project owners increasingly demand CIPP curing validation, it makes sense to make this technology available with every liner order.

## ANNOUNCING EASIER DELIVERY. SEAMLESS ORDERING.

We want to make it easier for you to take delivery on VeriCure. As the leading manufacturer of CIPP liners in the country, it just makes sense for United Felts to deliver VeriCure with your liner, making your ordering process more seamless and efficient.

VeriCure wire is available at all United Felts Manufacturing and Wetout facilities across the U.S. VeriCure orders can be emailed to [orders@unitedfelts.com](mailto:orders@unitedfelts.com).
